

Lodge Complex

CA-MEU-007202

OPERATIONAL PERIOD

Tuesday August 12th 0700 to Wednesday August 13th 0700

1. INCIDENT NAME 2. DATE 3. TIME **INCIDENT OBJECTIVES** 8/11/14 2000 Lodge Complex 4. OPERATIONAL PERIOD (DATE/TIME) 8/12/13 - 8/13/14 0700-0700 5. MANAGEMENT OBJECTIVES • Provide for and maintain public and firefighter safety by utilizing the incident safety analysis process. Protect the natural and cultural resources values at risk. • Be financially responsible for all management and fire suppression tactics. • Foster and enhance community, political, and economic relationships. 6. GENERAL CONTROL OBJECTIVES Keep fire South of the Big Bend of the Eel River. Keep fire North of Lincoln Ridge. Keep fire West of Elk Creek. Keep fire East of Hollow Tree Creek. Branch III – hold fire within current control lines. 7. WEATHER FORECAST FOR OPERATIONAL PERIOD A low pressure center will move onshore and then northeast of the fire during the operational period. Ridge top winds will shift to a more southwest direction with normal diurnal winds continuing in the lower elevations. No convection or precipitation is expected on the fire, however an increase in winds will occur over the ridges. 8. GENERAL SAFETY MESSAGE General Health. Exhaustion may compromise safety. Be on the lookout for signs of exhaustion. Environmental. Back to the basics of the 10 Standard Firefighting Orders. Hunters. Deer season is open in the general fire area. Hunters may be in the area. 9. Attachments (☑ if attached) ☐ Finance ☑ Shift Ticket Example ☑ Organization List (ICS 203) ☑ Medical Plan (ICS 206) ☑ Water Usage Plan ☑ Weather Forecast ☑ Air Operations (ICS 220) ☑ Training Message ☑ Fire Behavior Forecast ☑ Assignment List (ICS 204) ☑ PIO Message ☑ Unit Log 214 ☑ Travel Map ☑ Fire Suppression ☑ Safety Message Repair Plan ☑ Communications Plan (ICS 205) ☐ Archaeologist message ☑ Firing Checklist 11. APPROVED BY (INCIDENT COMMANDER) 10. PREPARED BY (PLANNING SECTION CHIEF)

INCIDENT Weather Forecast

FORECAST NO:

10

NAME OF FIRE: Lodge Complex

PREDICTION FOR: 24 hour SHIFT

UNIT: Cal Fire MEU

SHIFT DATE:

8/12/14 - 8/13/14 (0700-0700)

SIGNED:

Jim Dudley (T) Rich Thompson

TIME AND DATE

FORECAST ISSUED:

8/11/14 @ 1900

Incident Meteorologist

WEATHER DISCUSSION: A low pressure center will move onshore and move northeast of the fire during the operational period. Ridge winds will shift to a more southwest direction however normal diurnal winds will continue over the lower elevations. A Second low pressure area will sweep across Oregon on Wednesday. No convection or precipitation is expected on the fire however an increase in winds will occur over the ridges. From Wednesday night through Friday, high pressure ridging will build back into the region for a warming and drying trend along with terrain driven winds predominating.

WEATHER FORECAST:

WEATHER:

Mostly Clear.

TEMPERATURES:

Max: 83-91...except 78-83 ridgetops/upper slopes.

50-57...except 57-63 ridgetops/upper slopes.

HUMIDITY:

Min: 20-25%

Max: 70-85%...except 40-59% ridgetops/upper slopes.

20 FT WINDS:

RIDGETOP -

0700-1200: Southeast to south 3-6 MPH Gust 14 MPH

1200-2000:

South to southwest 4-8 MPH Gust 14 MPH.

2000-0700: East to southeast 2-4 MPH Gust 8 MPH.

SLOPE/VALLEY -

0700-1100:

Variable/upslope 2-4 MPH.

1100-1900: 1900-0700: Upvalley 3-6 MPH Gust 10 MPH. Downslope/downvalley 2-4 MPH.

STABILITY/INVERSION:

Below 1000 ft AGL...dissipating around 1300.

OUTLOOK FOR WEDNESDAY: Clear. Highs: 80-88... except 75-82 ridgetops. Lows: 49-59... except 57-63 ridgetops. Min RH: 15-30%. Max RH: 50-70%. Ridgetop winds: Northwest to north 3-5 MPH Gust 8 MPH. Slope/Valley winds: typical diurnal winds.

EXTENDED FORECAST THURSDAY THROUGH SATURDAY:

Mostly clear. Highs: 85-93...except 78-85 ridgetops. Lows: 52-60...except 60-66 ridgetops. Thursday:

Min RH: 15-30%. Max RH: 55-75%. Ridgetop winds: west to northwest 5-10 MPH Gust

15 MPH. Slope/Valley winds: typical diurnal winds.

Friday:

Mostly clear. Highs: 86-96...except 80-86 ridgetops. Lows: 54-62...except 62-68 ridgetops.

Min RH: 15-30%. Max RH: 55-75%. Ridgetop winds: west to northwest 5-10 MPH Gust

15 MPH. Slope/Valley winds: typical diurnal winds.

Saturday:

Mostly clear. Highs: 88-98...except 82-88 ridgetops. Lows: 54-62...except 62-68 ridgetops.

Min RH: 15-30%. Max RH: 55-75%. Ridgetop winds: west to northwest 5-10 MPH Gust

15 MPH. Slope/Valley winds: typical diurnal winds.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 11	TYPE OF FIRE: Wildfire
FIRE NAME Lodge Complex	OPERATIONAL PERIOD 8-12-14 (24 HR SHIFT)
DATE ISSUED 8-11-2014	TIME ISSUED 1900 HOURS
UNIT CALFIRE Mendocino Unit	SIGNED Renee Henault FBAN (T)

WEATHER SUMMARY *** Low pressure off the Northern California Coast will move onshore and to the NE.***

Tuesday: High temps 78-91 degrees; Min RH: 20-25%

Winds: Ridge top: S/SE 3-6 Gusts to14 until noon, then S/SW 4-8 Gusts to14 until 2000.

Slope/valley: Up slope variable until 1100, then up valley 3-6 Gusts to 10

Tuesday Night: Low temps: 50-63 Max RH: 70-85% valleys, 40-59% ridges upper slopes

Winds: Ridge top: E/SE 2-4 Gusts to 8 until 0700.

Slope/valley: Down slope/down valley 2-4 1900-0700

LAL: 1

OUTPUTS

FIRE BEHAVIOR

GENERAL

Increasing instability brings potential for increased fire behavior

Fine Dead Fuel Moisture Predicted: 5% Unshaded, 7% Shaded

Live Fuel Moisture= CHAMISE (50-60%) MANZANITA (75-80%) *both critical*

Probability of Ignition = 50% Shaded fuels, 70% Unshaded.

Spotting Distance= 1/4 mile ERC in Timber: >97th percentile Forecast Burning Index: 77

- Expect surface fire in timber understory with transition to canopy likely when winds align with slope. Group torching and short runs possible with torching flame lengths up to 75' and 120 ch/hr.
- The fire area has no fire history or known fuel modification in the last 50 years. Safety zone for expected fire behavior should be no less than 1 acre in diameter (60 personnel and equipment).
- Surface fire transition to crown possible when sustained eye level winds within the fuel sheltering are greater than 6mph.

SPECIFIC

Branch I

Burn out of interior/understory fuels; creeping and smoldering. Large diameter fuels will have long burn out times. Night inversion and marine layer influence will create smoky conditions with limited visibility. Watch for fire weakened trees near the roads.

Branch II

Northerly winds and higher fuel moistures in the Eel River drainage contribute to slow, backing fire behavior. The fire continues to progress to the north toward Little Low Gap Creek and Hwy 101. Visibility under heavy canopy will limit crew's ability to monitor the main fire, lookouts in good vantage points are essential.

Branch IV **Anticipate increased fire behavior as burnout operations merge with main fire**

Firing operation on Div. N moved laterally from dozer/hand line that drops down to the Eel River. Re-burn potential exists in areas where fire intensity was not adequate to consume the over story. Winds may align with drainages and ignite these areas. Spotting and rollout from slop over in Divisions P and W will continue to challenge crews sending embers up to ¼ a mile.

Location / Fuel Type	Max Flame Length	Max Rate of spread	Spotting	Probability of Ignition
All Divisions:Timber-Shrub	< 10'	<13 ch/hr	¼ mi	50-70%
Divisions K,L,M,N Moderate Load Timber Litter	< 6'	<11 ch/hr	¼ mi	50-70%
Division P/W Slopover Broadleaf Litter	< 2'	<2 ch/hr	¼ mi	50-70%
Isolated patches- Brush	<20	<75 ch/hr	1/4 mi	50-70%

AIR OPERATIONS:

Inversion over the fire area until 1200 below 1000'AGL. Afternoon SW winds may impact visibility at the helibase.

SAFETY

Be alert for re-burn potential in areas where canopy has been scorched/pre-heated.

SAFETY MESSAGE "LODGE COMPLEX"

CA-MEU-007202 August 12, 2014 0700-0700

GENERAL HEALTH

EXHAUSTION MAY COMPROMISE SAFETY!

BE ON THE LOOKOUT FOR SIGNS OF EXHAUSTION AND LOOKOUT FOR ONE ANOTHER

- Poor diet can cause chronic feelings of exhaustion
- · Arduous work can consume body fluids, electrolytes at higher rates
- Steep terrain and hot dry conditions increases the risk of fatigue and exhaustion

Mitigation - Proper nutrition reduces fatigue and exhaustion emergencies

- · Eat foods which provide steady energy · limit sugary, fatty, fried and processed foods
- Hydrate-proper hydration prevents fatigue Manage work rest ratio while performing work
- Rest-get quality rest when you can and help your body repair itself from multiple days of arduous work.

ENVIRONMENTAL

BACK TO THE BASICS - 10 STANDARD FIREFIGHTING ORDERS

SIGNIFICANT WEATHER PATTERN IS PREDICTED THROUGHOUT NORTHERN CALIFORNIA

- #1 Keep informed on fire weather conditions and forecasts
- #3 Base all actions on current and expected behavior of the fire
- #5 Post lookouts when there is possible danger.

Mitigation - Brief your forces on current Incident Action Plan information

- Everyone deserves a complete briefing
- · Maintain control of your forces at all times
- · Fight fire aggressively, having provided for safety first

HUNTERS

DEER SEASON IS OPEN IN THE GENERAL FIRE AREA - HUNTERS MAY BE IN THE AREA

- Watch out for hunters hiking or traversing the area
- · Alert supervisors of hunters in the area
- Make notifications for appropriate Law Enforcement response if needed

Mike Waters

SAFETY OFFICER

EMERGENCY FREQUENC	Y: CALCORD	And the second s	T				The state of the s		

LINE EMERGENCY:

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - 1. Closest EMS resource
 - 2. Communications Unit
- Communications Unit contacts:
 - 1. Ground or Air ambulance as requested
 - 2. Operations
 - 3. Safety
 - 4. Medical Unit (707) 984-6925
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit on CALCORD with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - 1. Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - 6. Comps/Claims

FIRE SUPPRESSION REPAIR PLAN LODGE COMPLEX: CA-MEU-007202 8/8/2014

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by *fighting* the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

Dozer operators will install waterbreaks (waterbars) on all dozer lines as well as secondary access roads while performing mop-up operations. *Dozer lines amongst the structures* shall have the berms pulled and waterbreaks installed where necessary with <u>hand crews</u> to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document rehabilitation needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate areas in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression. Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously abandoned but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damages or damages mitigated to the Fire Suppression Repair Unit leader.
- Complete all repair work prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- On Federal land, spread brush across the disturbed areas to provide ground cover and a seed source.
- On Federal land, masticators/excavators/dozers with brush rakes will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading within a WUI Threat or Defense Zone.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities. Use cut brush if available and nearby to block off potential OHV access. On Federal land, break up piles and scatter brush over the fireline.
- Remove outboard berms created during suppression activities and incorporate into road surface.

Watercourses

- All slash, soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent future stream bank failure.

Archaeological or Historic Sites - Notify incident Archaeologist and Fire Suppression Repair Group.

Waterbreak/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	100'	75'	50' (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. <u>DO NOT</u> compromise fire lines by spreading flammable material across them.

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

All assigned trainees

working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The Training Specialist is available immediately following the morning Operations Briefing to 20:00

Ron Karlen Chris Barden

Training Specialists

CAL FIRE

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
